## **Executive Summary**

Section 58.1-3529 of the *Code of Virginia* requires this report and the forecast contained herein. The reimbursement percentage for tax years 2003 through 2008 is assumed to be 70 percent of the first \$20,000 in vehicle value.

Actual Personal Property Tax Relief Act (PPTRA) reimbursements for fiscal year 2003 totaled \$856.7 million, \$17.3 million below the official forecast of \$874.0 million. Fiscal year 2003 represented the first time in the history of the program that reimbursements were less than the forecast. The forecast variance is attributed to an overestimation of tax year 2001 delinquencies and a slowdown in the sale of new and used vehicles.

Table 1 below shows historical PPTRA reimbursements as they compare to forecast and the November PPTRA reimbursement forecast for fiscal years 2004 through 2008.

**Table 1**

Difference (%)	-11.9	-0.1	-0.9	-2.0	2.0					

NOTE: Fiscal year 2000 actual reimbursements are adjusted downward by the \$17.4 million in reimbursements that occurred in fiscal year 2000 but were booked to fiscal year 2001. Fiscal year 2001 actual reimbursements include this amount.

PPTRA reimbursements are driven by vehicle counts (qualifying vehicles) and average assessed vehicle value. Historical and forecast data for these two variables are shown in Table 2 on the next page, comparing tax year 2002 estimates with those for tax year 2003.

2006	2.4	1.8	2.5	3.8
2007	2.4	1.8	2.5	3.5
2008	2.4	1.8	2.5	3.8

The number of qualifying vehicles is a key determinant of growth in reimbursements. However, a lack of current data on qualifying vehicles makes it necessary to rely on the number of registered vehicles by locality in the Commonwealth. The computation and comparison of a two and eight-year annualized growth rate in registered vehicles provides the basis for estimating future growth. The 2003 model utilizes the smaller of these two growth rates, generating the total expected growth in PPTRA qualifying vehicles shown above. Available history shows that the growth in vehicle registrations has been an accurate indicator of the growth in qualifying vehicles.

The other key determinant of growth in reimbursements is average assessed vehicle value. The growth rate for this variable is based on a fifteen-year annualized moving average of new and used vehicle prices. The computed growth rate is then adjusted for pricing anomalies. Table 3 on the following page provides data on actual and forecasted average prices for new and used vehicles.

**Table 3**  
**Average New and Used Vehicle Prices**

## Description Of The PPTRA Program

Local governments apply to the state Comptroller for a dollar for dollar reimbursement of the property tax reduction. Reimbursements are limited to the first \$20,000 in vehicle value and apply only to passenger cars, motorcycles, and pickup/panel trucks which are privately owned or leased for personal use and weigh 7,500 pounds or less. Vehicles with an assessed value of \$1,000 or less are reimbursed for 100 percent of the taxes paid. The reimbursements were originally based on the schedule shown in Figure 1.

**Figure 1**  
**Tax Year Reimbursement Percent Schedule**

<u>Tax Year</u>	<u>Percent Remibursement</u>
1998	12.5
1999	27.5
2000	47.5
2001	70.0
2002	100.0

Section 58.1-3524.C of the *Code of Virginia* establishes conditions under which the next level of tax relief can proceed. If any one of the following conditions occurs, the level of tax relief provided in the following tax year cannot exceed the level of tax relief provided by the Commonwealth in the previous tax year:

- I. Actual general fund revenues for a fiscal year, including transfers, are less than the projected general fund revenues, as reported in the general appropriation act in effect at that time, by one-half of one percent or more of the amount of actual general fund revenues for such fiscal year.
- II. The general fund revenue forecast provided by the Governor to the General Assembly in December, pursuant to §2.1-393 of the *Code of Virginia* indicates that general fund revenues, excluding transfers, for any fiscal year will be less than five percent greater than general fund revenues for the immediately preceding fiscal year.
- III. The general fund revenue forecast provided by the Governor in December pursuant to §2.1-393 of the *Code of Virginia* indicates that total general fund revenues available for appropriation, including transfers, for either of the fiscal years, covered by the general appropriation act in effect at that time, will be less than the general fund appropriations for such fiscal year or years.

In addition, §58.1-3536 of the *Code of Virginia* caps total tax relief reimbursements to treasurers at 8.5 percent of the total general fund revenues available for appropriation for payment in any fiscal year. If anticipated reimbursements exceed this level, the percentage of tax relief applicable for the related tax year must be reduced to ensure actual expenditures do not exceed the statutory cap.

### Fiscal Year 2003 In Review

Actual PPTRA reimbursements for fiscal year 2003 totaled \$856.7 million, \$17.3 million below the official forecast of \$874.0 million. Some of the factors that drove the 2.0 percent forecast variance were:

- Delinquent reimbursement requests: 62.4 percent, or \$10.8 million, of the forecast variance was the result of overestimating tax year 2001 delinquencies.
- Sales of new and used vehicles: Sales of new and used vehicles declined 0.5 percent and 2.7 percent, respectively, compared with forecasted growth rates of 1.9 percent and 0.2 percent, respectively.

Appendix A provides data on actual and forecasted PPTRA reimbursements by locality for fiscal year 2003.

### Summary Of The Fiscal Year 2004 Forecast

As Table 4 below illustrates, the November forecast for fiscal year 2004 is \$901.2 million, \$19.5 million less than the amount in the fiscal year 2002 to 2004 Appropriations Act, Chapter 1042.

**Table 4**  
**The Official and November PPTRA Reimbursement Forecast**  
**Fiscal Years 2004 through 2008**

	<u>FY04</u>	<u>FY05</u>	<u>FY06</u>	<u>FY07</u>	<u>FY08</u>
Official Forecast	920.7	964.4	1010.5	-	-
Growth (%)	7.5	4.7	4.8		
November Forecast	901.2	947.9	996.9	1046.8	1098.3
Growth (%)	5.2	5.2	5.2	5.0	4.9
<b>Difference (\$)</b>	<b>-19.5</b>	<b>-16.5</b>	<b>-13.6</b>		

The forecast was developed using data on qualifying vehicles and average assessed vehicle value. Table 5 on the following page summarizes historical and forecasted growth rates for qualifying vehicles and average assessed vehicle value, comparing the tax year 2002 forecast to the tax year 2003 forecast.

2008	2.4	1.8	2.5	3.8

#### Qualifying Vehicle Growth Rates

Data on active vehicle registrations by locality is used to determine the growth in qualifying vehicles. There are currently ten years of data, from 1993 through 2002. Qualifying vehicles are forecasted using a two-year and eight-year growth rate computed from the series. A comparison between the two growth rates is made, with the one being selected the lower of the two. This methodology results in the total expected growth in PPTRA qualifying vehicles shown above.

#### Average Assessed Vehicle Value Growth Rates

The expected growth rate in average assessed vehicle value is generated using a fifteen-year annualized moving average of new and used vehicle prices. Unlike the growth rate in qualifying vehicles, information is not available on a locality-by-locality basis. The computation of the growth rate is presented in Appendix D.

Recent pricing anomalies have made it necessary to adjust the computed growth rates for average assessed vehicle value. Zero-percent financing, along with other incentives offered by dealers, has helped to maintain the automobile industry in this time of economic contraction. However, in order to accommodate the deals offered to consumers, dealers have increased base prices. This has resulted in vehicle value growth that is not totally economic based. Adjustments made to the computed growth rates have been included in Appendix D.

These two variables provide the key to forecasting reimbursements. Other key forecast points are:

- The reimbursement rate is assumed to be 70 percent over the forecast horizon and applied to the first \$20,000 of vehicle value. Vehicles valued at \$1,000 or less are reimbursed at a rate of 100%. However, these vehicles are excluded from this analysis because they do not make up a significant portion of the qualified vehicle fleet.
- The most recent years' percent distribution for vehicle counts and total vehicle value for a particular locality is applied to the forecast of these variables to generate the expected distribution.
- Localities currently have a five-year window to submit reimbursement requests for a particular tax year. It is assumed that after the fourth fiscal year for any given tax year, reimbursements are complete. This assumption is supported by historical data that shows reimbursements in the fifth year to be insignificant.

Appendix B provides data on actual and forecasted PPTRA reimbursements by locality for fiscal years 1999 to 2008.
