Section 2.2-1503.3 of the Code of Virginia Establishes Criteria for Conducting a Reestimate of General Fund Revenues...

- The Code requires a reestimate of general fund revenues if the sum of collections of net individual income, sales, and corporate income tax are 1.0 percent or more below the Official forecast for the three sources based on preliminary actual collections for the year.
 - The combined shortfall exceeded the \$139.6 million threshold.
- The August 2007 interim revenue forecast is based on the updated economic outlook for Virginia as approved by the Governor's Advisory Board of Economists (GABE).
 - GABE was presented with the May 2007 standard economic outlook for Virginia, which is based on the May 2007 Global Insight standard forecast for the U.S. A majority of the Board supported slight upward revisions to employment and income growth.
- The interim forecast also incorporates input from attendees of the Virginia Housing Market Outlook meeting and has been reviewed by the Governor's Advisory Council on Revenue Estimates (GACRE).

Recent Tax Policy Actions Have Significantly Reduced Revenues...

Significant Tax Policy Changes Affecting General Fund Revenues (millions of dollars)

August Forecast	FY08	FY09	FY10
Increase Filing Threshold/Personal Exemption	-13.5	-27.1	-26.9

\$0.03 Recordation Tax to Transportation	0.0	-53.0	-57.8
Total	-50.1	-353.8	-365.2

- For the FY08-10 biennium, the repeal of the estate tax and transfers to transportation will reduce general fund revenues available for appropriation by over \$300 million per year.

<i>Annual % Change</i>	<u>FY08</u>	<u>FY09</u>	<u>FY10</u>
Revenue Base	3.0%	3.7%	6.5%
Economic Base	3.1%	5.7%	6.5%

- Economic base growth rates adjust for the repeal of the estate tax effective July 1, 2007 and the transfer of one-third of prior year insurance company premiums and \$0.03 of recordation tax to transportation beginning in FY09.

Withholding Has Been Revised Marginally From the Official Forecast...

- The withholding revenue model is based on a relationship with wages and salaries in Virginia.

	Wage & Salary Growth	Withholding Growth
FY07 estimate	5.2%	6.4%
FY08 forecast	5.5%	6.0%
FY09 forecast	5.7%	6.0%
FY10 forecast	6.2%	6.2%

- Growth in wages and salaries is projected to be weaker in the May GABE forecast over the next two fiscal years as compared with the Official economic forecast.
 - However, a small revenue surplus for withholding in FY07 more than offsets the downward revision to income growth.

FY08 +\$34.7 million, FY09 +\$31.2 million, FY10 +\$68.9 million

Individual Nonwithholding Has Been Revised Up From the Official Forecast...

- The revenue model for nonwithholding considers the two payment types independently.
 - Estimated payments are modeled as a function of non-wage income and the S&P 500 index.
 - Final payments are driven solely by growth in the S&P 500 index. The forecast for the current year is anchored to June year-to-date growth (5.0 percent) in the index.

Final Payments and the S&P 500, FY88-10
Percent Growth Over Prior Year

- Slightly stronger growth in financial markets and non-wage income over the forecast horizon result in upward revisions over the next three years.

FY08 +\$125.7 million, FY09 +\$139.7 million, FY10 +\$155.9 million

The Forecast for Individual Refunds Has Been Revised Up Substantially Over the Forecast Horizon...

- The previous refund methodology compared the historical relationship of calendar year payroll withholding to the following year individual refunds to determine a proxy for future refund activity.
- The revised refund methodology now includes individual nonwithholding for a calendar year as compared to refunds for the following year.
 - In a perfect world, one would not assume that taxpayers would overestimate income tax payments.
 - Current data indicate that there is a lag in adjusting payments to slowing income prospects.
- Both methods estimate an amount of refunds to be issued in each half of the following calendar year based on historical patterns.

The Forecast for Individual Refunds Has Been Revised Up Substantially Over the Forecast Horizon (continued)...

- Anecdotal evidence suggests that the downturn in housing has significantly reduced self-employment income.
- A significant portion of the forecast revision is attributable to increases in the Land Preservation credit.

Land Preservation Credit (millions of dollars)

	<u>Official</u>	<u>June</u>
FY07	75	150
FY08	100	200
FY09	100	225

FY07 estimate	5.3%	2.7%
FY08 forecast	5.6%	2.8%
FY09 forecast	6.0%	5.3%
FY10 forecast	6.2%	5.5%

* FY07 adjusted for the end of the Accelerated Sales Tax Program in FY06.

- Growth in personal income has been revised down over the next three fiscal years in the May GABE forecast. Taken together with a small revenue shortfall for sales in FY07, the sales tax forecast has been revised down.
- Over the last three months, representing taxable sales for April through June, sales tax collections have declined 0.6 percent compared to the prior year.

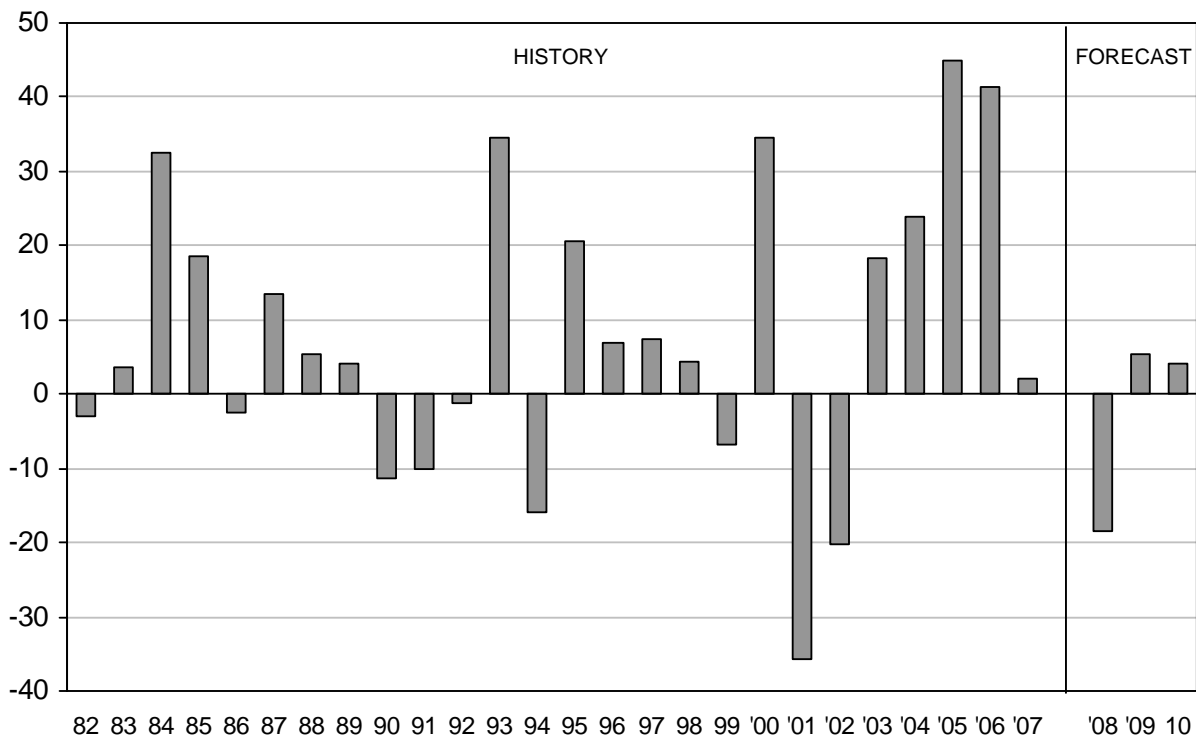

FY08 -\$119.1 million, FY09 -\$133.3 million, FY10 -\$137.1 million

- Other states have also experienced a significant slowdown in sales tax collections.

The Outlook for Corporate Income Tax Collections Has Been Revised Down Over the Forecast Horizon...

- The corporate revenue model considers gross payments and refunds separately.
 - Gross payments are modeled as a function of Virginia specific pre-tax corporate profits and S&P 500 index.
 - Refunds are driven by the historical ratio of gross payments to refund activity.
- Taken together, net corporate income tax receipts have been revised down over the forecast horizon, following the small revenue shortfall in FY07.

FY08 -\$68.7 million, FY09 -\$99.0 million, FY10 -\$102.1 million

The Outlook for Recordation Tax Collections Has Been Revised Down From the Official Forecast...

- The revenue model for recordation is based on refinancing activity, median home prices, and the yield on 30-year treasury bonds.
- Based on input of attendees of the Virginia Housing Market Outlook meeting, the forecast for recordation taxes was reduced from a 5.0 percent decline to a decline of 9.0 percent in FY08.
 - This equates to 2001 volumes and no significant decline in the average sales price.
